This is a translation of an important classic on Zen swordfighting. Yagyu's Buddhist spirituality is reflected in his central idea of the life-giving sword' - the notion of controlling an opponent by the spiritual readiness to fight, rather than during the fight. This is a translation of an important classic on Zen swordfighting. Yagyu Munenori was so widely renowned that he was appointed official sword instructor to two Tokugawa shoguns. Is nature all there is? John Haught examines this question and in doing so addresses a fundamental issue in the dialogue of science with religion. The belief that nature is all there is and that no overall purpose exists in the universe is known broadly as 'naturalism'. Naturalism, in this context, denies the existence of any realities distinct from the natural world and human culture. Since the rise of science in the modern world has had so much influence on naturalism's intellectual acceptance, the author focuses on 'scientific' naturalism and the way in which its defenders are now attempting to put a distance between contemporary thought and humanity's religious traditions. Haught seeks to provide a reasonable, scientifically informed alternative to naturalism. His approach will provide the basis for lively discussion among students, scholars, scientists, theologians and intellectually curious people in general.

"Tells the story of migrants and communities in the Southeast Asian borderlands. The Black Flags raided their way from southern China into northern Vietnam, competing in the second half of the nineteenth century against other armed migrants and uplands communities for control of commerce (e.g., opium) and natural resources (e.g., copper for making coins). At the edges of empires--the Qing empire in China, the Vietnamese empire governed by the Nguyen dynasty, and, eventually, French colonial Vietnam--the Black Flags and their rivals sustained networks of power and dominance through the framework of political regimes. The history of these imperial bandits and the communities that resisted them demonstrates the plasticity of borderlines, the limits of imposed boundaries, and the flexible division between apolitical banditry and political rebellion in the borderlands of China and Vietnam. Historical studies of these areas tend to examine events only from the perspective of local communities or from the anxious view of imperial officials. By focusing on the Black Flags, upland communities, and their relationships to various empires, this study illustrates borderland processes at the violent edges of empire. It contributes to the ongoing reassessment of borderland areas as frontiers for state expansion, arguing that projects of empire often were instruments of power for armed migrants and their allies, and that, as a setting for forms of human activity that defy tight boundaries, borderlands continued to exist well after the establishment of formal boundaries"--
